## DETAILED ACTION

### *Claim Rejections - 35 USC § 102*

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1, 3, 4, 5, 6 & 7 are rejected under 35 U.S.C. 102(b) as being anticipated by abstract of Xie et al. "*Evidence for the Effect of Gender on Activity of (S)-mephenytoin 4'-hydroxylase (CYP2C19) in a Chinese Population*" (herein referred to as "Xie").

Xie teaches subjects that are given 1 100mg tablet of racemic mephenytoin after emptying their urinary bladders. Amounts of (S) and (R) mephenytoin excreted in the post-dose 0-8 h urine collection were determined. From all subjects, metabolic phenotype was determined and DNA was extracted from their blood for genotyping.

### *Claim Rejections - 35 USC § 103*

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Art Unit: 1743

4. The factual inquiries set forth in *Graham v. John Deere Co.*, 383 U.S. 1, 148 USPQ 459 (1966), that are applied for establishing a background for determining obviousness under 35 U.S.C. 103(a) are summarized as follows:

1. Determining the scope and contents of the prior art.
2. Ascertaining the differences between the prior art and the claims at issue.
3. Resolving the level of ordinary skill in the pertinent art.
4. Considering objective evidence present in the application indicating obviousness or nonobviousness.

5. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Xie in view of USP 5,710,009 to Fitzpatrick (herein referred to as "Fitzpatrick").

Xie teaches the invention substantially as claimed with the exception of expressly teaching that mephentyoin may be detected in a saliva sample. However, Fitzpatrick teaches that it is well known to test for metabolites in serum, saliva or urine (col. 18, lines 19-26). Thus, it would have been obvious to one having ordinary skill in the art to modify Xie by using any of these body fluids to test for mephentyoin with the expectation of achieving reliable results.
